

SAHIL LANGOO

Srinagar, Jammu & Kashmir, India 190003 | +91 7006 588 022 | sahilahmed3066@gmail.com

sahillangoo.in | linkedin.com/in/sahillangoo | github.com/sahillangoo

TECHNICAL SUMMARY

Cloud & DevOps Systems Engineer with deep expertise in edge serverless infrastructure, automated CI/CD pipelines, containerization, and production reliability. Specializing in Cloudflare (Workers, Pages, R2), GitHub Actions automation, Docker multi-stage workflows, and supply-chain lockfile security.

TECHNICAL SKILLS

Languages & Scripting: Bash / Shell Scripting, TypeScript, Python, Go, YAML, SQL
Frameworks & UI: Node.js, Docker, Hono, Playwright, Vitest, Astro
Cloud & DevOps: Cloudflare (Workers, Pages, R2, KV, Turnstile, WAF), Vercel, GitHub Actions CI/CD, AWS (S3, CloudFront)
Databases & Tools: Git & GitHub CLI, pnpm Lockfile Integrity, Sentry Telemetry, Wrangler, Linux / POSIX, MySQL, PostgreSQL, SQLite / D1, ESLint / Prettier

PROFESSIONAL EXPERIENCE

Eresolution Consultancy Services

Remote

DevOps & Edge Infrastructure Engineer

Apr 2025 - Present

- Architected and maintained serverless Hono API gateways on Cloudflare Workers, processing 15K+ daily requests with sub-100ms execution latency.
- Automated Playwright end-to-end regression suites integrated with GitHub Actions CI, reducing release cycle duration by 35% while enforcing pnpm lockfile supply-chain verification.
- Centralized Sentry exception telemetry across microservices, establishing automated alerting thresholds and reducing Mean Time to Resolution (MTTR) by 40%.

Taffin.Tech

Remote, Srinagar

DevOps & Infrastructure Developer

Apr 2024 - Aug 2025

- Engineered continuous integration pipelines and automated quality lint gates for recruitment platform microservices with GitHub Actions.
- Hardened GDPR data retention policies and instrumented real-time error telemetry thresholds with Sentry.
- Optimized Docker asset staging pipelines with Webpack Encore to reduce container build footprints by 30%.

SquadCoders

Kashmir, India

Freelance DevOps Engineer

Dec 2023 - Mar 2024

- Architected multi-stage Docker deployment pipelines and automated GitHub Actions workflows, deploying static web platforms to Cloudflare Pages with zero-downtime rollouts.
- Engineered custom pre-flight build-time quality hooks in Node.js (astroSiteQualityEnforcer), eliminating broken links, missing assets, and unoptimized payloads before artifact publishing.
- Configured Cloudflare edge rules, SSL/TLS strict policies, and Turnstile bot protection, achieving 99.99% availability and sub-50ms global TTFB.
- Automated deployment workflows across 10+ production web platforms with continuous telemetry integration.

Elance Technologies

Srinagar, Kashmir

Infrastructure & Web Trainee

Jan 2023 - Jun 2023

- Maintained Linux server environments, Nginx reverse proxy configurations, and automated cron backup routines with POSIX shell scripts.

TECHNICAL PROJECTS

School Management Application Infrastructure / Next.js 16 (Hostinger Standalone), Cloudflare (CDN/WAF/R2), Telegram Bot, MySQL, Sentry (kwschool.in) 2024

- Deployed standalone Next.js 16 output build on Hostinger VPS, reducing runtime memory overhead and optimizing server execution for 500+ student records.
- Configured Cloudflare CDN/WAF security rules, provisioned Cloudflare R2 object buckets, and automated Telegram Bot API transactional alert pipelines.

Multi-Tenant Ad-Driven Platform CI/CD / Next.js, Vercel CI/CD, Git Branch Workflows, Meta CAPI, Cloudflare Edge (www.expertsupport.org) 2024

- Automated deployment workflows on Vercel using Git branch-based preview and production environments, accelerating deployment velocity and risk-free staging verifications.
- Configured server-side Meta Conversions API (CAPI) with SHA-256 data hashing and PII stripping across telemetry pipelines.

Smart Image CLI / Bun, TypeScript, Sharp, Local SLMs / LM Studio (github:smart-img-cli) 2024

- Built high-throughput image optimization CLI in Bun, automating WebP/AVIF compression pipelines with multi-threaded batch workers.
- Integrated local offline vision SLMs via LM Studio for automated semantic image classification, eliminating cloud API costs and data privacy exposure.

Portfolio Automated CI/CD Engine / Astro, TypeScript, GitHub Actions, Wrangler, Cloudflare (sahillangoo.in) 2024

- Constructed automated static site generation pipeline with Astro, TypeScript, and Wrangler, publishing immutable edge builds via Cloudflare Pages in under 60 seconds.
- Enforced zero-warning linting, formatting, and strict type-checking gates in GitHub Actions.

EDUCATION

University of Kashmir (North Campus) Baramulla, Kashmir, India
Bachelor of Technology in Computer Science Engineering (CGPA: 7.07) 2021 - 2023

- **Relevant Coursework:** Data Structures & Algorithms, Object Oriented Programming, Cloud Computing, Software Engineering, Web Technologies.

Kashmir Govt Polytechnic Srinagar, Kashmir, India
Diploma in Computer Science Engineering (CGPA: 6.22) 2016 - 2019

CERTIFICATIONS

- **Meta Front-End Developer Professional Certificate** (Meta / Coursera)
 - **Ecommerce Platform Architecture Masterclass** (Scaler)
 - **Full Stack Web Development & Architecture (Zero To Mastery (ZTM))**
- **Complete Next.js Developer (Frontend Masters)**
 - **Crash Course in Python (Google / Coursera)**
